First Design_MTS Conference on CSR and Sustainability in Machine Tools Sector

Lamiera Trade Show, 15 May 2014, Bologna, Italy

The conference served as an invaluable platform to reach the project's stakeholders from industry, academia and civil society and provided an opportunity to explain how companies can get involved and benefit from the project tools offered, such as training modules, a help desk, guidelines and the exchange of best practices. Specifically, the DESIGN-MTS project will share business practices with the sector and value chain, and show stakeholders how the European machine tool sector contributes to society, the economy and the environment.

About Design_MTS

Design_MTS was initiated and partly funded by the European Commission (contract 333720) and is led by University of Macerata in partnership with CSR Europe, the European Association of the Machine Tool Industries (CECIMO), Central European Initiative (CEI), Istituto Ricerche Economiche e Sociali (IRES) and the University of Nottingham. The duration of the project is 18 months, from July 2013 to December 2014. More information about Design_MTS is available [here](#).

The press release of project partner CECIMO and more information on the Design_MTS Conference are available [here](#).
