

DESIGN-MTS: Conference and project booth, LAMIERA 2014 14 – 17 May 2014, Bologna, Italy

The European machine tool industry is working intensively on ensuring that its processes, products and services can be designed, manufactured and operated in a socially and environmentally responsible manner.

To this end, the DESIGN-MTS project aims at increasing CSR awareness and disseminating best CSR practices in the European machine tool industry. The project, partly funded by the European Commission, brings together University of Macerata, CECIMO (European Association of the Machine Tool Industries), University of Nottingham, CSR Europe, Central European Initiative and IRES.

DESIGN-MTS will be well presented during the LAMIERA trade show in Bologna, Italy from 14 to 17 May. It will be featured in a project booth found in Hall 36/Stand B30, and a special conference will be organized to inform stakeholders from academia, industry and civil society about the DESIGN-MTS project concept as well as CSR and sustainability trends in the European machine tool industry and along its supply chain. The conference will take place on 15 May from 11:45 to 12:30 at the LAMBDA Sustainability Section (Hall 36/Stand C15). [Click here to get a free entrance ticket.](#)

See you in Bologna!
